

ABSTRACT

A digital camera 1 of the present invention has shown
on a display 9 a graphical user interface having a first
5 display portion for inputting priority ratio of high speed
in access to an external memory card 11 to recordable
capacity in formatting the external memory card 11, a
second display portion for showing a cluster size, and a
third display portion for showing the number of images
10 recordable to the external memory card 11. The recording
medium is formatted with the cluster size shown on the
second display portion in response to the user's
manipulation.
